Calculating Family Expenses using Service Now

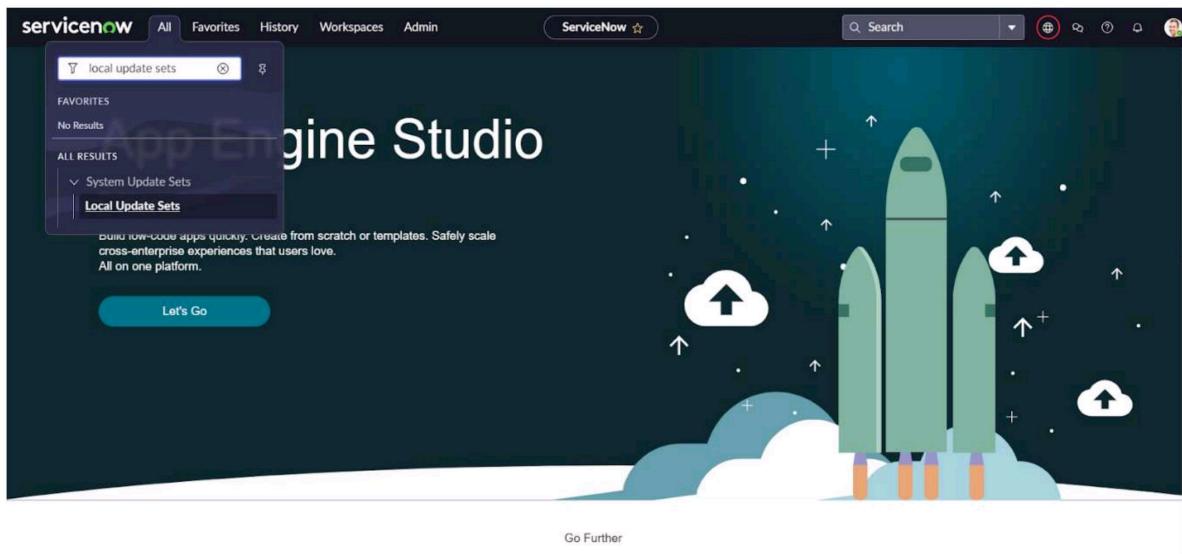

The project aims to develop a comprehensive expense calculation system using ServiceNow. This system will enable users to track and manage family expenses efficiently. It will include features such as expense categorization, budget setting, real-time tracking, and reporting capabilities. Utilizing ServiceNow's robust platform, the project will ensure seamless integration, user-friendly interface, and scalability to accommodate varying family sizes and financial complexities. The end goal is to empower users with the tools they need to make informed financial decisions and promote financial well-being within the family unit.

Setting up ServiceNow Instance

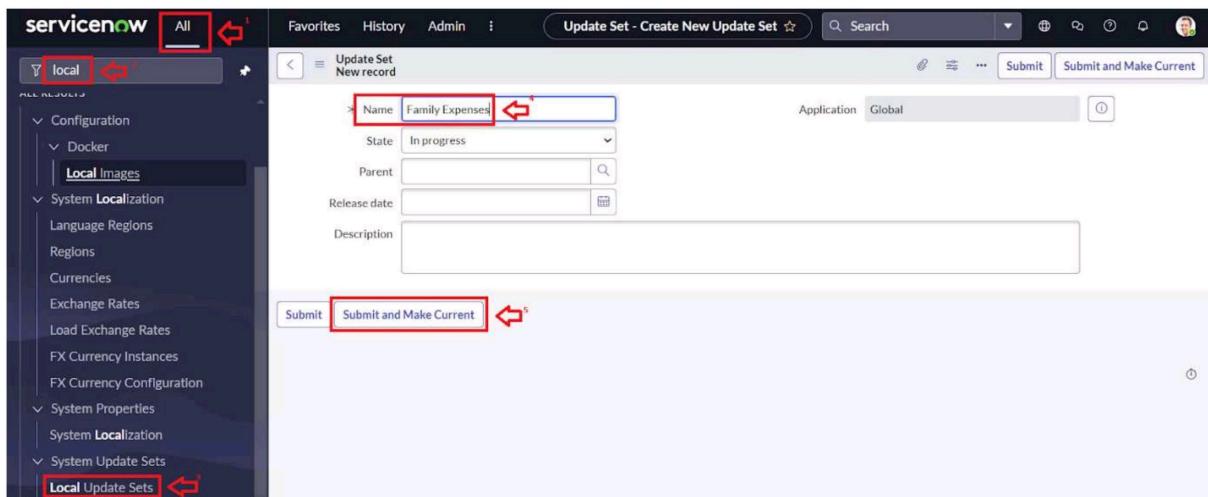

1. Sign up for a developer account on the ServiceNow Developer site "<https://developer.servicenow.com>".
2. Once logged in, navigate to the "Personal Developer Instance" section.
3. Click on "Request Instance" to create a new ServiceNow instance.
4. Fill out the required information and submit the request.
5. You'll receive an email with the instance details once it's ready.
6. Log in to your ServiceNow instance using the provided credentials.
7. Now you will navigate to the ServiceNow.

Creation of New Update Set

1. Go to All >> In the filter search for Local Update set > click on New.

2. Enter the Details as:
Name : Family Expenses
3. Then click on Submit and Make current

Creation of Family Expenses Table

1. Go to All > In the filter search for Tables > click on New.
2. Enter the Details:

Label : Family Expenses

Name : Auto-Populated

New menu name : Family Expenditure

The screenshot shows a software interface for creating a new menu item. At the top, there are two input fields: 'Label' containing 'Family Expenses' and 'Name' containing 'u_st_family_expenses'. To the right, there are several configuration options: 'Application' set to 'Global', 'Remote Table' checked, 'Create module' checked, 'Create mobile module' checked, 'Add module to menu' set to '-- Create new --', and 'New menu name' set to 'Family Expenditure'. Below this, there is a table titled 'Table Columns' with columns for 'Column label', 'Type', 'Reference', 'Max length', 'Default value', and 'Display'. The table contains three rows:

	Column label	Type	Reference	Max length	Default value	Display
<input type="button" value="X"/>	<input type="button" value="Edit"/> Number	<input type="button" value="String"/>			false	
<input type="button" value="X"/>	<input type="button" value="Edit"/> Date	<input type="button" value="Date"/>			false	
<input type="button" value="X"/>	<input type="button" value="Edit"/> Amount	<input type="button" value="Integer"/>			false	

3. Go to the Header and right click there>> click on Save.

Creation of Columns(Fields)

1. Near Columns Double click near insert a new row.
2. Give the details as:

Column label : Number

Type : String

3. Double click on insert a new row again
4. Give the details as:

Column label : Date

Type : Date

5. Double click on insert a new row again
6. Give the details as:

Column label : Amount

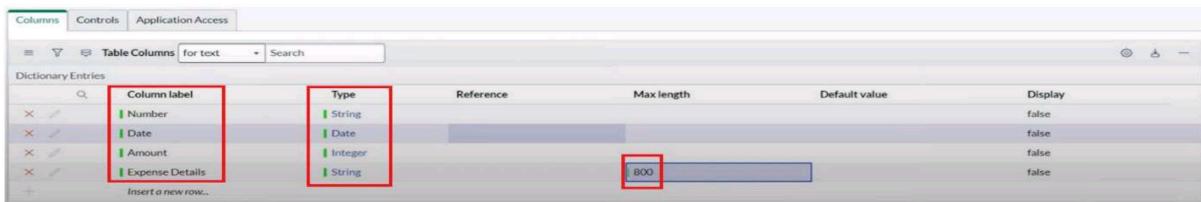

Type : Integer

7. Double click on insert a new row again
8. Give the details as:

Column label : Expense Details

Type : String

Max length : 800

Column label	Type	Reference	Max length	Default value	Display
Number	String				false
Date	Date				false
Amount	Integer				false
Expense Details	String		800		false

9. Go to the Header and right click there>> click on Save.

Making Number Field an Auto-Number

1.Double click on the Number Field/Column.

2.Go down and double click on Advanced view

3.In Default Value:

Use dynamic default : check the box

Dynamic default value : Get Next Padded Number

4.Click on Update.

The Default value specifies what value the field has when first displayed.

Use dynamic default 1

Dynamic default value: Get Next Padded Number 2

Delete Column Update 3 4

5.Go to All >> In the filter search for Number Maintenance >> select Number Maintenance

6.Click on New.

7.Enter the below Details:

Table : Family Expenses

Prefix : MFE

The screenshot shows a configuration screen for a 'Number' entity named 'MFE'. The 'Table' field is set to 'Family Expenses'. The 'Prefix' field contains 'MFE'. The 'Number' field is set to 1,000. The 'Application' field is set to 'Global'. The 'Number of digits' field is set to 7. At the bottom, there are 'Update' and 'Delete' buttons.

1. Go to All >> In the filter search for Business Rules.
2. Under System Definition Select Business Rules then click on New.
3. Enter the Details:

Name : Family Expenses BR

Table : Select Daily Expenses

Check Advanced

5. In Advance(we write the code): Write the below code >>

```
(function executeRule(current, previous /*null when async*/) {
    var FamilyExpenses = new GlideRecord('u_family_expenses');
    FamilyExpenses.addQuery('u_date', current.u_date);
    FamilyExpenses.query();
    if(FamilyExpenses.next())
    {
        FamilyExpenses.u_amount += current.u_expense;
    }
})
```

```

FamilyExpenses.u_expense_details +=  

">" + current.u_comments + ":" + "Rs." + current.u_expense + "-";  

FamilyExpenses.update();  

}  

else  

{  

var NewFamilyExpenses = new GlideRecord('u_family_expenses');  

NewFamilyExpenses.u_date = current.u_date;  

NewFamilyExpenses.u_amount = current.u_expense;  

NewFamilyExpenses.u_expense_details +=  

">" + current.u_comments + ":" + "Rs." + current.u_expense + "-";  

NewFamilyExpenses.insert();  

}  
  

})(current, previous);

```

6. Go to the Header and right click there>> click on Save

Configure the Relationship

1. Go to All >> In the filter search for Relationships >> Open Relationships.
2. In that, open Daily Expenses Relationship.
